

INTRODUCTION

1,2,3! That is how easy it is to copy a Blu-Ray, DVD or a CD with the Addonics family of Blu-Ray/DVD DigiCopier! You can copy any Blu-Ray, DVD or CD disc without a computer. All you need to do is place the master disc into the source drive located on the top of the unit and a blank media into the rest of the other drives below the source drive. Close all the drive doors and start the copying process, and within a few minutes your Blu-Ray, DVD or CD disc is copied.

Designed to take advantage of the high performance SATA technologies, all Addonics DigiCopiers are equipped with the latest high speed SATA optical drives that are available in the market. There is a choice of four models to offer disc duplication of 1 copy, 3 copies, 7 copies or up to 11 copies at one time depending on your volume requirement. Each model is equipped with a user friendly LCM control module that provides a rich set of option configuration choices.

About this family of Blu-Ray duplicator

This family of BR-DVD DigiCopiers comes in choice of model with eight Blu-Ray burners (model # DGBRC7) or a model with four Blu Ray and four DVD-RRW burners (model # DGBR3DR7). The DGBRC7 allows you make up to seven copies of Blu-Ray, DVD or CD disc all at one time. Whereas the DGBR3DR4 allows making copies up to three Blu-Ray disc or seven DVD/CD disc at one time. An eSATA port is also available on the back of these DigiCopier for attaching an optional external eSATA hard drive. With the additional of an eSATA hard drive, Blu-Ray, DVD or CD image can be copied onto the hard drive to use as a source. You can store as many images as needed depending on the capacity of your hard drive. By using the hard drive as a source, all optical drives in the DigiCopier are now available to use as the target drive, further increasing the copying capacity to as many as eight disc at one time.

STEP 1

Insert media you wish to duplicate into the source tray on the top.

STEP 2

Populate the destination trays below with blank media.

STEP 3

Select Copy on the LCD interface to begin the duplication process!

FEATURES

- Choice of model for duplicating up to
- Model: DGBRC7 - duplicates up to seven Blu-Ray, DVD or CD disc at one time
- Model: DGBR3DR7 - duplicates up to three Blu-Ray or seven DVD/CD disc at one time
- Operate as stand alone appliance. No computer required
- User-friendly interface and intuitive message display on the LCM control module
- High speed 14X Blu-Ray, 16X DVD and 48X CD drive for maximum throughput
- Support copying* of Blu-Ray, CD, DVD, DVD dual layer
- High-speed simultaneous recording
- Copy per cycle completes in as little as 6 minutes or less for a 4.5G DVD source image when copying onto 16X DVD media.
- Built-in eSATA port on the back for attaching an optional 3.5" or 2.5" eSATA hard drive to use as the source drive for storing disk images (.ISO format). When using the eSATA hard drive as the source drive, all optical drives in the unit can be used as target drives to increase copying capacity
- Edit track feature collects audio tracks on a number of CDs and merges them onto a single CD compilation (or a partition on the optional external eSATA hard drive)
- LCM control module provides a rich set of robust advanced configuration options
- firmware update using DVD-ROM disc
- 110/240V universal power supply for worldwide use

*Note: copy-protected material may not duplicate successfully in these duplicators
