

INTRODUCTION

1,2,3! That is how easy it is to copy a DVD or a CD with the Addonics family of DigiCopier! You can copy any DVD or CD without a computer. All you need to do is place the master into the source drive located on the top of the unit and a blank media into the rest of the other drives below the source drive. Close all the drive doors and start the copying process, and within a few minutes your DVD or CD is copied.

Designed to take advantage of the high performance SATA technologies, all Addonics DigiCopiers are equipped with the latest high speed SATA optical drives that are available in the market. There are choices of four models to offer disc duplication of 1 copy, 3 copies, up to 7 copies or 11 copies at one time depending on your volume requirement. Each model is equipped with a user friendly LCM control module that provides a rich set of option configuration choices.

About this model

This model DVD/CD DigiCopier make as many as eleven copies of Blu-Ray, DVD or CD disc at one time. There is no computer or software to run. Just load the master disc to the source drive and the blank media to the target drives, then follow by a simple push of the copy button to start the copying process.

STEP 1

Insert media you wish to duplicate into the source tray on the top.

STEP 2

Populate the destination trays below with blank media.

STEP 3

Select Copy on the LCD interface to begin the duplication process!

FEATURES

- Copy up to eleven DVD or CD disc at one time
- Operate as stand alone appliance. No computer required
- User-friendly interface and intuitive message display on the LCM control module
- High speed 24X SATA DVD drive for maximum throughput
- Support copying* of CD, DVD, DVD dual layer
- High-speed simultaneous recording
