

Adding the USB3.1 host controller card to an existing Windows system

Software Installation:

Note: Install Asmedia driver first by running the setup file from the CD that came with your package before installing the host controller.

- A Follow the setup wizard steps to install the Addonics USB3.1 host controller driver
- B After driver installation, it is recommended to shutdown your system.

Hardware Installation:

1. Power off PC and remove its cover.
2. Select an empty PCIe 4-lane slot and insert the USB 3.1 controller
3. Makes sure to secure the bracket with a screw. Close the PC cover.
4. Attach a 15-pin SATA power cable from the system's power supply to the 15-pin SATA power connector on the host controller.
