Technical Support

If you need any assistance to get your unit functioning properly, please have your product information ready and contact Addonics Technical Support at:

Hours: 8:30 am - 6:00 pm PST

Phone: 408-453-6212

Email: <http://www.addonics.com/support/query/>

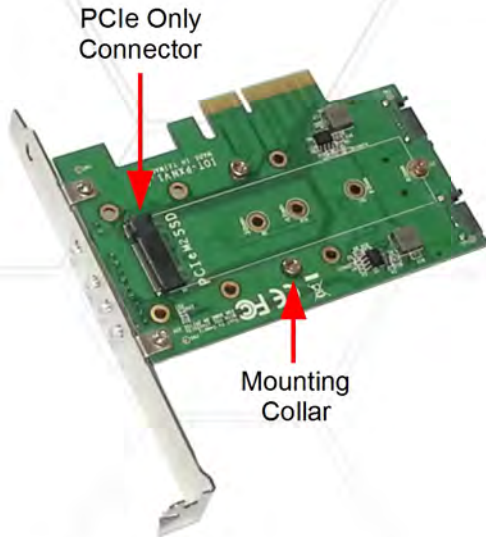

Installation

SATA SSD
connectors

The two connectors on the “front” side of the card work ONLY with SATA M.2 devices. The adjacent SATA connector is used to connect the SATA M.2 device to a SATA controller.

The connector on the “back” side of the card works ONLY with PCI Express M.2 devices. SATA-only SSD devices will NOT work on this connector.

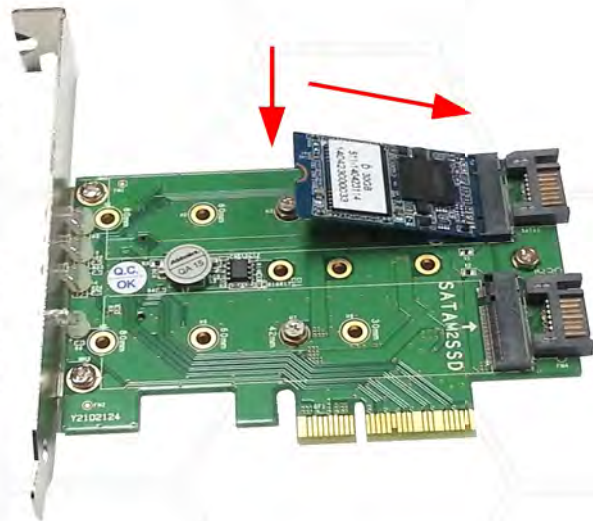

PCIe Only
Connector

Mounting
Collar

If needed, turn the card over so the opposite side of the device to install is shown, and remove the screw on the mounting collar to move it to the correct position.

To install the M.2 device, insert into the connector at an angle, then gently press down and secure it to the Mounting Collar with the screw.

The power LED glows to indicate the board has power. The “SATA SSD” and “PCIe SSD” LED behavior is determined by the M.2 devices. Generally it will either flicker to indicate activity, or glow steadily to indicate power and flicker to indicate activity.
