If you need any assistance to get your unit functioning properly, please have your product information ready and contact Addonics Technical Support at:

Hours: 8:30 am - 6:00 pm PST

Phone: 408-453-6212

Email: <http://www.addonics.com/support/query/>

Installing the 2.5" Snap-In SP

Screw the device into the 3.5" drive bay of your computer. After unit is screwed in, attach the SATA power cable that comes with the unit and the SATA data cable into the device's connectors as shown above. Connect the LED cable to the 4 pin LED port on the back of the device. Attach the other end of the cables to your computer or host controller.

Front View

Opening device and inserting HD

By default the lock should be set to the open (up) position. Pull the lever to open up the device and slide in the 2.5" HD right side up.

After inserting your HD to the device, close the cover. Lock the cover with the included key by turning it clockwise all the way.

Removing the HD

Make sure that there is no HD activity before unlocking the cover. Pull the lever and carefully pull out the HD.

Note: The HD can reach temperatures exceeding 50°C. Handle with care to prevent accidental burning.
