Quick Guide

Installing the 1:7 optical duplicator

Step 1

Insert the 1:7 Blu-Ray / DVD Duplicator into standard 5.25" drive bay.

Step 2

Connect the power cable from you system to the 4-pin floppy power connector.

Step 3

Connect the source drive to the source SATA port via SATA cable and the target drives to the destination SATA port via SATA cable.

Step 4

Screw the duplicator into the drive bay with 4 screws (2 on each side).

Duplicating drive(s)

Make sure the source and target drives are connected to the proper ports. When the duplicator is on, it will go through the steps below.

Step 1

Duplicator LED will light up and the device will beep.

Step 2

LCD will display initial steps:

1. **Duplicator Ver:** - Displays duplicator version
2. **Initializing SDRAM**
3. **Detect Source/Target** - Will detect the type of source/targets
4. **Copy** - Defaults to the first function which is to copy

Step 3

Once the duplicator gets to the copy menu, press ENT to begin copying. The duplicator will auto-detect the drive and display its information on the LCD. Make sure that the power LEDs of the flash reader are blinking, the blinking indicates drive activity.

You can find the complete user manual of the 1:7 Blu-Ray / DVD Duplicator panel on the driver disk under user guides. You can also download it from our website at www.addonics.com/support/user_guides/

Panel Functions

The Duplicator has 6 functions to choose from:

1. Copy

Function#1 Copy, instant copy source (disc/image) to the target drives (optical writes). Use Function#8 to select source drive before copying. Select function#1. place a source disc into source drive and blank disc into the target drives. A rewriteable disc can be used as target media, however all data will be erased before copying.

Press ENT to start copy function when all discs are ready. After complete, system will show spent time and the amount of OK disc on the screen, the OK disc will be ejected.

2. Test

Function#2, copy simulation, no data will be written to the write once media (DVD+R is not supported for this function).

Press ENT to start simulation. If rewriteable disc is used, all contained data will be erased before simulation.

3. Test & Copy

Function#3, will do copy simulation before copy function. Press ENT to start simulation and copy. Note, only passed test disc will do the copy.

4. Verify

Function#4, check readability of the burned disc.

5. Compare

Function#5, to check if target disc is identical to source disc.

Compare result :

OK: Source and target disc are identical

Fail: TOC not match, compare skipped due to contains do not match.

Diff: Shows how many bytes are different.

6. Prescan

Function#6, to check if source disc is readable and without read error.

7. Disc Info

Function#7, to report disc information, disc type and capacity.

8. Select Source

Function#8, to set which drive as source device. The drive on CH01 will be chosen as source device. Press ENT, and then press ▲ ▼ to select the source.

Assume that HDD is selected as the source device and selected partition contains no data, an error message "Source Drive Not Ready" will show on LCD while trying copy function. In that case, go to Function#9 Image to load the data into the chosen partition first.

9. Image

Function#9 Image is valid only when a hard disk is installed. Disc is loaded to hard disk as an image file.

9.1 Load

Load function loads whole disc data from any writers into the current partition of the hard disk. "P:A" means current partition is A.

9.2 Delete Image

If you want to delete an image file stored in a particular partition, you can use this function to delete image. Press ENT , the system will confirm with you for the action, use ▲ ▼ to select Yes or No, then press ENT for confirmation.

9.3 Image Info

To check selected image information. First, enter into the function and press ▼ for more information.

9.4 Compare Image

This function is used to check if created image is identical to source disc.

When result shows on LCD, press ENT for more detail information.

Compare result :

OK: Source and target disc are identical

Fail: TOC not match, compare skipped due to contains not match.

Diff: shows how many bytes are different.

9.5 Select Image

This function is to select a partition as source image from the hard disk. Pressing ▲ ▼ to select a partition, LCD will show image name and capacity.

9.6 Image Src Drive

This function is used to set the image source drive for loading disc data into a particular partition. Enter into the function and use ▲ ▼ to select image source drive.

9.7 ImageFormat Info

This function shows which format is used for current hard disk. It is related to function#12.4 Format HDD.

9.8 Edit

This function is to edit selected image's title, sub1 title and sub2 title. Only valid when the current partition contains an image file can title. A title should be composed of 1 to 13 characters. The character can be alphabet, number or the combination of both. Use ▲ ▼ to select the number or alphabet. After selecting a desired one, press ENT for next character, the end of key in, press and hold ENT for 2 sec and release for next title.

9.9 Format HDD

Hard disk must be formatted by the system for the very first time. Hard disk will be partitioned into the chosen partition format. If no hard disk is installed, LCD will show the message as No Valid HDD! All data on the hard drive will be erased after the hard disk format. After the hard drive is formatted correctly, LCD will show "Format HDD ok!.", Press ENT to verify HDD or press ▼ and choose No return back to menu.

9.10 LoadImage Method

This function is to change the way to save Image. There are 2 formats for choice: Auto and Manual. Auto means system auto assign partition for loaded image. Manual let you to choose which partition to load image to.

10 Edit Track (for Audio CD only)

Function#10 Edit Track is exclusively designed for editing a collection of favorite songs from CDs. In other words, you can collect songs on a number of CDs and merge them into a single CD. There are 3 sub-functions: CD to CD, CD to HDD and Close Session.

10.1 CD to CD Edit

To select songs from source CD, and then burn into a blank CD-R/RWs.

You can press ▼ to see the rest of tracks. If you want to select the track, press ENT then a "+" shows up, press ENT again will cancel the selection. After selection, use ▲ ▼ move to the "End" which is between 1st track and last track. Press ENT to end of selection, and use ▲ ▼ to confirm Yes or No. Press ENT after burning, system will ask if you want to continue edit, use ▲ ▼ to confirm Yes or No. If you want to continue edit, the current source CD will be ejected and ask you to insert next disc. Repeat the above process for editing.

After editing, system will show "Close all disc's session ? Yes", use ▲ ▼ to confirm Yes or No. Once session is closed, no more tracks can be added.

Attention:

Commercial audio player might not able to play open session disc, close session is suggested for max. compatibility.

10.2 CD to HDD Edit

To select tracks from single or multi-audio CD and create image to specific partition of HDD

The basic operation method is same as CD to CD Edit, system still ask you to insert empty disc even the target drive is HDD. If burning successful, system will show "Image load OK", which means the selected tracks are written to temporary partition.

Press ENT after burning, system will ask if you want to continue edit, use ▲ ▼ to confirm Yes or No. If you want to continue edit, the current source CD will be ejected and ask you to insert next disc. Repeat the above process for editing. If "No" is selected, system will show "Burn or Move to partition ?", use ▲ ▼ to confirm Burn or Move.

Burn : Burn the selected tracks to CD

Move to partition : Create an image for selected tracks.

10.3 Close Session

Single session format is used for Audio CD, and commercial audio player is not able to play open session audio CD, therefore session must be closed to max. playback compatibility. However, no more tracks can be added once session is closed.

11 LightScribe (Optional Function)

LightScribe is an optical disc recording technology that uses specially coated recordable CD and DVD media to produce laser-etched labels with text or graphics, as opposed to stick-on labels and printable discs. This function includes 6 sub-functions: Print, Load LSI to HDD, Select LSI File, Delete LSI File, Load LSI Drive and Copyright Info.

11.1 Print

Use optical drive's laser to print loaded LSI file. Disc should be placed up side down.

11.2 Load LSI to HDD

Load LSI to hard disk.

11.3 Select LSI File

Select LSI file from hard disk for laser printing.

11.4 Delete LSI File

Delete a LSI File stored in a particular partition. Use ▲ ▼ to confirm Yes or No.

11.5 Load LSI Drive

This function is to select source drive in order to load LSI File into a particular partition.

11.6 Copyright Info

This function is to see the LightScribe copyright information.

12 Setup

To change the default setting. However, it is suggested to use the default for the optimal operation. There are 24 sub-functions: Language, Burn Speed, Read Speed, Auto Start Drive, Startup Menu, Auto Verify, Auto Compare, Auto Prescan, Eject Disc, Burn On The Fly, Burn Mode, Display Time, Button Sound, Device Info, System Info, Quick Erase, Full Erase, Auto Close Tray, Quick Compare, Tray-In/Out, BootTime Delay, Start Tray Eject, Disc Redetect and Show Burn Speed.

12.1 Language

Now press ENT, and you will enter the following figure. The function Language lets you select a language in which messages can be shown on LCD.

12.2 Burn Speed

Now press ESC and ▼ to enter the following figure. This function lets you control the burning speed of CD writers. DVD Burn Speed is defaulted to 16X, BD Burn Speed default is 4X, CD Burn Speed default is 32X and Audio Burn Speed is defaulted to 16X.

12.3 Read Speed

To change default reading speed of source disc. The default is Off. Press ▼ to select 1 or 2 (blank disc).

12.4 Auto Start Drive

System will auto start to copy or test once blank disc is ready.

12.5 Start Up Menu

To select any function from #1 to # 13 as the first item appears on the screen whenever system is turned on.

12.6 Auto Verify

To set if auto verify target disc's readability after copy function. The default is Off. Press ▼ to select On.

12.7 Auto Compare

To set if auto do comparison after copy function to check if source and target disc are identical. The default is Off. Press ▼ to select On.

12.8 Auto Prescan

To set if auto scan source disc before copy function. The default is Off. Press ▼ to select On.

12.9 Eject Disc

There are 3 kinds of tray behavior when copy process is completed.

Eject Good Only: Only good disc will be ejected after burning.

Eject All Disc : All discs will be ejected after burning.

Do Not Eject : All discs stay in after burning.

The default is Eject Good Only.

12.10 Burn On The Fly

Burn On The Fly means data will be copied directly from the source disc to the target disc. When the setting is Off, the data will be loaded into temporary partition of HDD first, then copy from HDD to disc. The default is On. Press ▼ to select Off.

12.11 Burn Mode

There are two modes: DAO (Disc At Once) and TAO (Track At Once). The default is DAO. Press ▼ to select TAO.

12.12 Display Time

To set if display a timer while copying. The default is On. Press ▼ to select Off.

12.13 Button Sound

To enable or disable beep sound while press a key.

12.14 Device Info

To show the writer information.

12.15 System Info

To show system Information.

12.16 Quick Erase

To erase data on the DVD rewriteable discs quickly.

12.17 Full Erase

To erase data on the DVD rewriteable discs completely. Compared with Quick Erase, Full Erase takes longer time to do the job.

12.18 Auto Close Tray

All tray will be closed in selected time and if disc is ready, system will auto start copy, test or both functions, depends on which function is stay on the LCD screen.

The default is Off, press ▼ to select 1 Byte, 1 KB, 10 KB, 100KB, 1 MB, 10MB, 100MB etc.

12.19 Quick Compare

Quick Compare is related to function#5 Compare. Once compare error byte reach to the setting figures, compare process will stop.

12.20 Link Mode Select (Select Models)

Now press ESC and ▼ to enter the following screen. Press ENT to enter the “Link Mode Select” screen. Use ▲ ▼ to choose between the Stand Alone, Middle Tower or Last Tower modes as appropriate.

Attention: Once a tower has been set as Middle Tower or Last Tower and the J14 jumper is also set to Target mode, the LCD will show that it is in Target mode.

12.21 Re-Scan (Select Models)

Now press ESC and ▼ to enter the following screen. Press ENT to enter the “Re-Scan” screen. By default this is set to No. Use ▲ ▼ to choose Yes then press ENT to scan the chosen connected tower.

12.22 Tray-In/Out

Lets you control the drive tray ejecting. The default is All Once and there have Divide 2 Times for selection. The default is 5 second, more option is up to 99 seconds.

12.23 BootTime Delay

To set the device scanning time during the system booting.

12.24 Start Tray Eject

To set if do eject all tray after system boot up. The default is On. Press ▼ to select Off.

12.25 Disc Redetect

The function is designed specially for bad quality disc, the system will detect the disc one more time if disc recognition error occurred. The default is Off. Press ▼ to select On.

12.26 Show Burn Speed

Now press ESC and ▼ to enter the following figure. This function lets LCD shows the burning speed of CD/DVD/BD writers. The default is On. Press ▼ to select Off.
