Technical Support

If you need any assistance to get your unit functioning properly, please have your product information ready and contact Addonics Technical Support at:

Hours: 8:30 am - 6:00 pm PST

Phone: 408-453-6212

Email: <http://www.addonics.com/support/query/>

Overview

Installation

1. Be sure the drive door is unlocked. If not, use the key that came with the enclosure to unlock the drive door. Pull gently on the door lever and swing open the drive door.
2. Slide a 3.5" SATA hard drive into the drive slot with the drive connector side facing in and the label side up. The drive should slide all the way into the slot with very little resistance, do not force it.
3. Once the drive is all the way into the drive slot, close the door all the way till the drive door latches securely. If desired, lock the drive door with the key.
4. Connect the USB 3.0 cable to a host, connect power and turn on the unit. The drive should appear as a Standard Plug and Play Mass Storage Device, which is Read Only.
