### **Addonics Announces the Mini NAS, a Small Portable Network Storage Enclosure Solution That Provides Cross-Platform Access of Shared Data**

SAN JOSE, CA, November 16, 2009 -- Addonics Technologies ([www.addonics.com](http://www.addonics.com)) today announced a small and portable network storage enclosure solution called the Addonics Mini NAS. The new storage device provides fast access to data across most platforms.

Among its key features are a fast Ethernet 10/100Mbps connection and the ability to install any 2.5" SATA hard drive or Solid State Drive (SSD) and make it instantly sharable over any LAN. A USB printer can also be shared over the LAN simultaneously when attached to the Mini NAS.

The Mini NAS is the approximate size of a VHS tape cassette and weighs less than a pound. Its size makes it very portable and allows it to be installed in a small space.

The Mini NAS supports both SMB (Server Message Block) and open source Samba network protocols. This provides for cross-platform access of all shared data for most versions of Windows, Mac OS X, and various Linux distributions.

For remote users not connected over a LAN, the Mini NAS provides FTP access for up to eight simultaneous users anywhere in the world with an internet connection. In addition, the Mini NAS can be configured as a bit-torrent downloading appliance or as an iTunes media server.

Other features include ease of installation; low power requirements; the ability to be set as a DHCP server or client; support of Samba servers for up to 64 clients; support of FTP servers for up to eight clients, and the ability to be used as a print server and an UPnP AV server to share photo/music files stored on the file server with XBOX 360 video game consoles connected to a LAN.

The Mini NAS also provides read/only or read/write access to folders and administrative management access via web browser with password security.

List price starts at \$69..
