

Hardware Installation:

Step 1: Plug in the Embedded IDE- Dual SATA Port Converter on the IDE controller on the motherboard.

Step 2: Using a 4-pin floppy power cable from the power supply, connect it to the 4-pin floppy power connector on the Embedded IDE- Dual SATA Port Converter. This will provide power to the converter.

Step 3: Connect a SATA drive to the SATA port 1 of the converter. This drive will show up as a master device in the motherboard BIOS.

Step 4: Connect a second SATA drive to the SATA port 2 of the converter. This drive will show up as a slave device in the motherboard BIOS.

v6.1.11

Technical Support
