

# ADDONICS TECHNOLOGIES

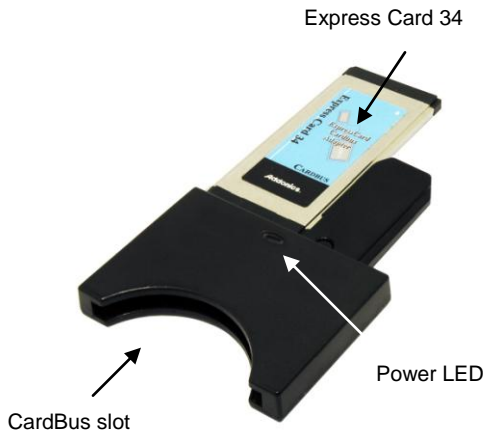

Model: ADEXC34CB

---

## Installation Guide

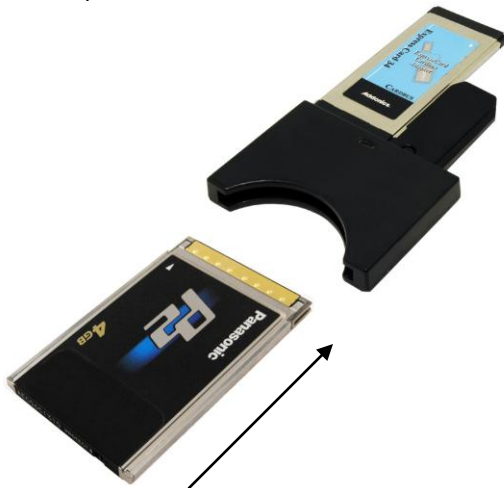

---

### Front View

**Power LED:** The power LED lights up when the adapter is plug to an Express Card 34 slot with or without a Cardbus device connected to it.

1. Insert the Cardbus device to the Cardbus slot on the adapter.

2. Slide the Express Card 34 Cardbus adapter to the Express Card 34 slot on the laptop.

**Note:** The Express Card 34 Cardbus adapter does not require a driver. It is the Cardbus device you connect to the adapter that require drivers

3. Follow the onscreen instructions to install the drivers of the newly installed Cardbus device.

### Hot Swap Feature:

If the Cardbus device supports hotswap, to enable this feature, you have to unplug the adapter with the Cardbus device still connected to the adapter. Removing just the Cardbus device won't hotswap the device.

### P2 Installation:

The P2 card requires a special procedure for installation. The video instructions on how to correctly install a P2 can be downloaded at the following locations:
